## HCL CONNECTIONS ACTIVITIES PLUS

### Colour tagging

The redesigned HCL Connections Activities is more up-to-date with colours, and explanatory icons.

In order to sort and find tasks in your project easier we offer drag-and-drop colour tagging of tasks. It is then easy to filter and sort your tasks on colour tag.

### Assigned tasks

If you want to assign a task to a team member, simply drag and drop the user icon onto the task.

You can easily filter your task per user by clicking on the user icon.

That way you get a visual overview of the workload of your team.

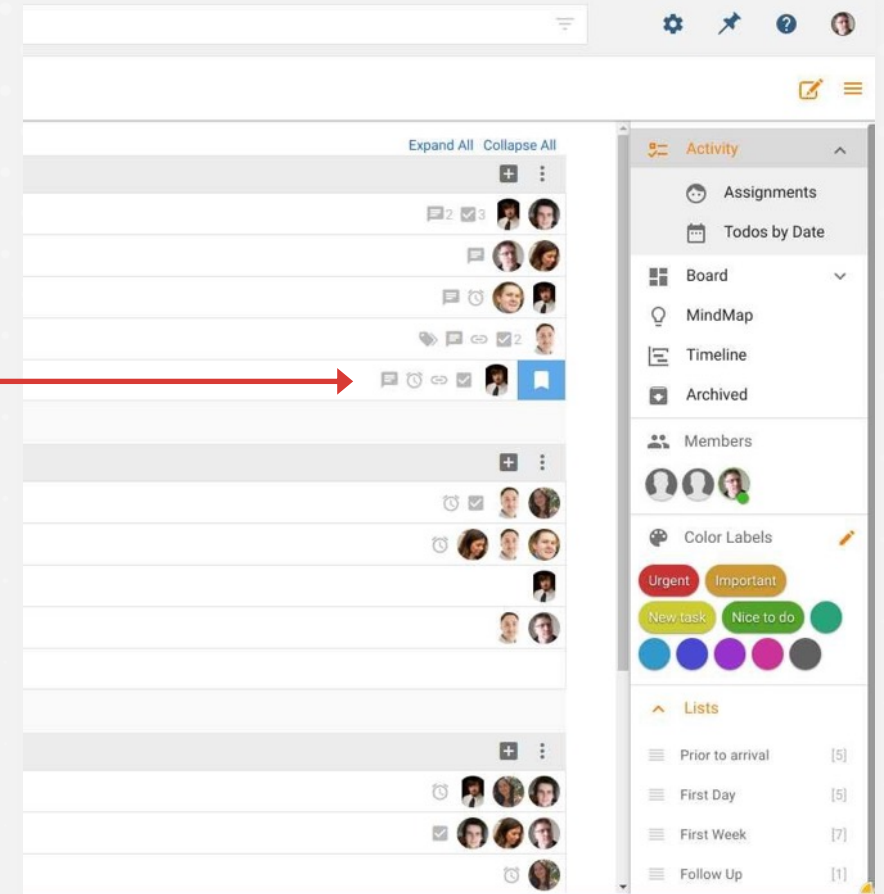

The screenshot displays the Kudos Boards interface for a project titled "New Employee Onboarding demo". The main area shows a list of tasks organized into three sections: "Prior to arrival", "First Day", and "First Week". Each task is represented by a card with a title, a checklist, and a color-coded tag. A red circle highlights a task in the "Prior to arrival" section: "Link organisation policies here, including EBA, WHS, etc.". The sidebar on the right contains navigation options: "Activity", "Assignments", "Todos by Date", "Board", "MindMap", "Timeline", "Archived", "Members", "Color Labels", and "Lists". A red circle highlights the "Color Labels" section, which shows a grid of color-coded tags: "Urgent", "Important", "New task", and "Nice to do".

## YOUR TASKS IN AN INSTANT

HCL Connections Activities Plus offers an additional set of icons to your tasks.

For example you can see if a task:

- has an attachment
- has a due date or is overdue
- has a sub-task
- has comments

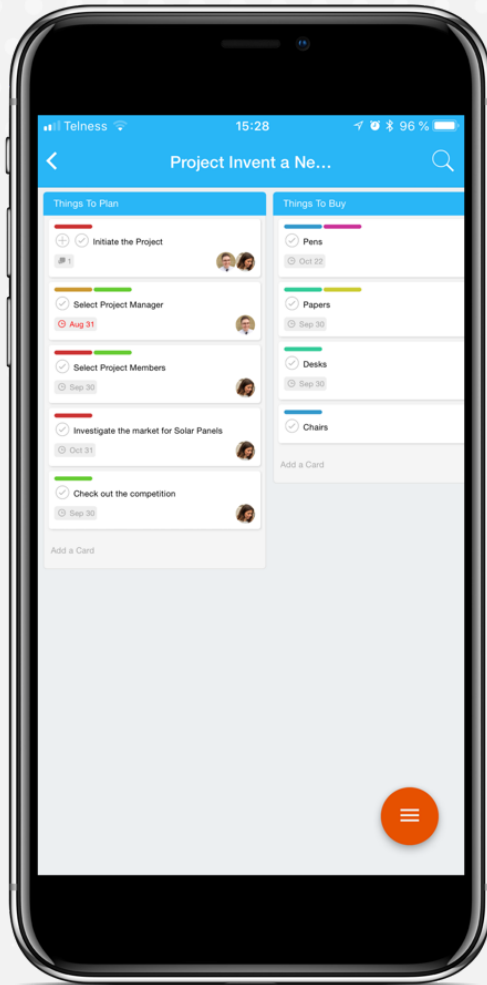

The screenshot shows the 'Public Templates' page in the Kudos Boards application. The top navigation bar includes links for ISW, Home, People, Communities, Files, Meetings, Host a Meeting, Activities, Buzzy, Kudos Boards, and Kudos Ideas. The main header features a search bar and navigation icons. The left sidebar contains a user profile, a 'Boards' section with a plus sign, a 'Todos' section with a checkmark, a 'Templates' section with a folder icon, 'Tile Colours' with a palette icon and several colored circles, and 'Board Labels' with a plus sign and the text 'No labels defined'. The main content area is divided into 'PUBLIC', 'MY', and 'ARCHIVE' tabs. Under 'PUBLIC', there are 'View' and 'Order' options, with 'Recent' and 'Name' selected. A 'New Template' button is highlighted with a dashed blue border. Below this, the 'All Boards' section displays a grid of template cards. Each card includes a title, a 'Last Accessed' status, and a progress indicator. The cards are: 'Design Workflow new' (Last Accessed 2 months ago, 0/2), 'Agile Team Project' (Last Accessed Never, agile development project, 0/58), 'Brainstorming an Idea' (Last Accessed Never, brainstorming problem solving..., 0/2), 'Conference Planning' (Last Accessed Never, conference, 0/38), 'Customer Key Accou...' (Last Accessed Never, customer account plan, 0/1), 'Design Workflow new' (Last Accessed 2 months ago, 0/2), 'Fundraising Dinner' (Last Accessed Never, 0/58), 'Marketing Campaign' (Last Accessed Never, marketing, 0/11), 'Meeting Agenda' (Last Accessed Never, meeting agenda, 0/2), 'Opportunity Loss Rev...' (Last Accessed Never, 0/3), and 'Prepare and deliver a...' (Last Accessed Never, presentation meetings, 0/35). A plus sign icon is visible in the bottom right corner of the grid.

## TEMPLATES

Activities Plus comes with a full stack of templates, ready to be used.

You can also create your own templates out of successful projects and team collaborations.

## MOBILE APPS

We do not want to limit your work to your office pc. We know that sometimes you need to update a project on the go, or check status on a task that needs to be ticked off.

Install the official mobile app, compatible with on-premise and cloud.

# UNLOCKING THE FULL KUDOS BOARDS EXPERIENCE

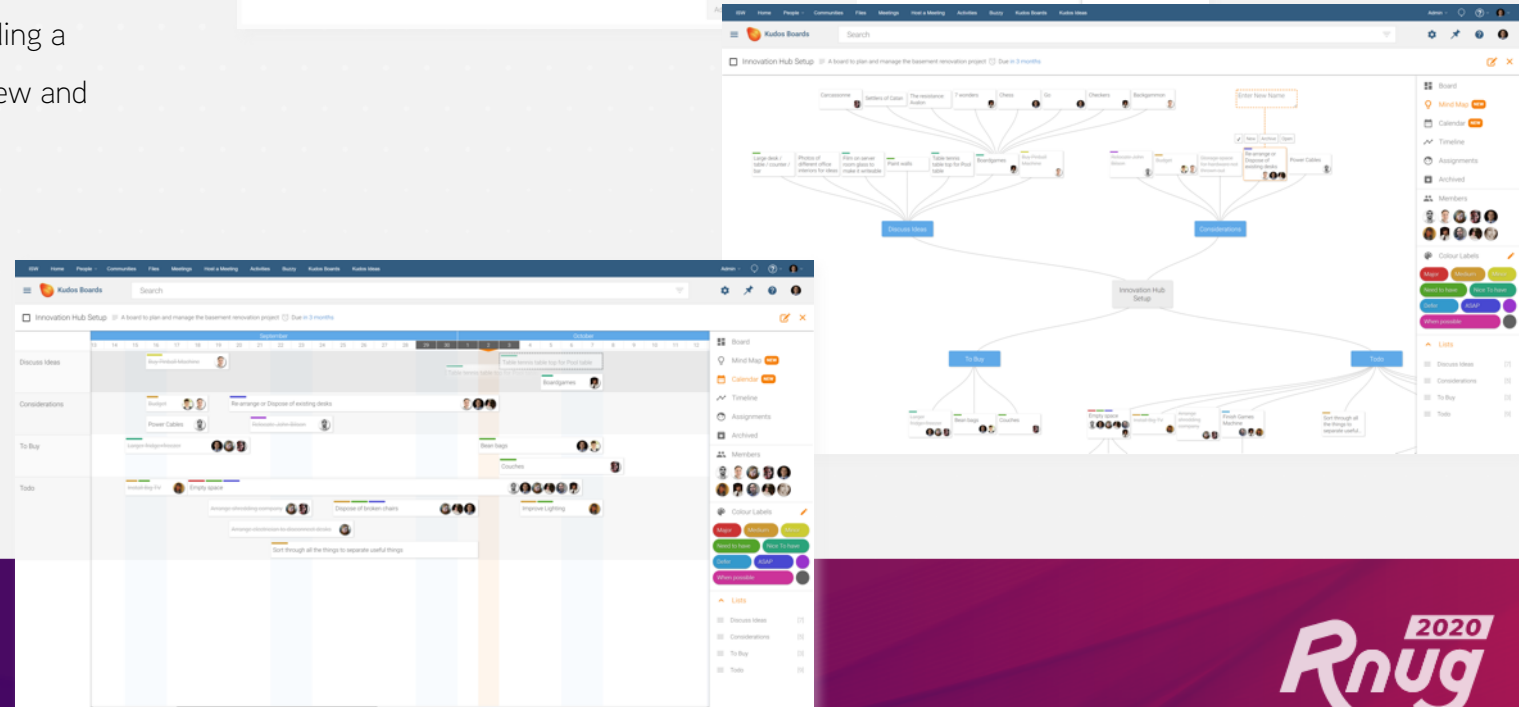

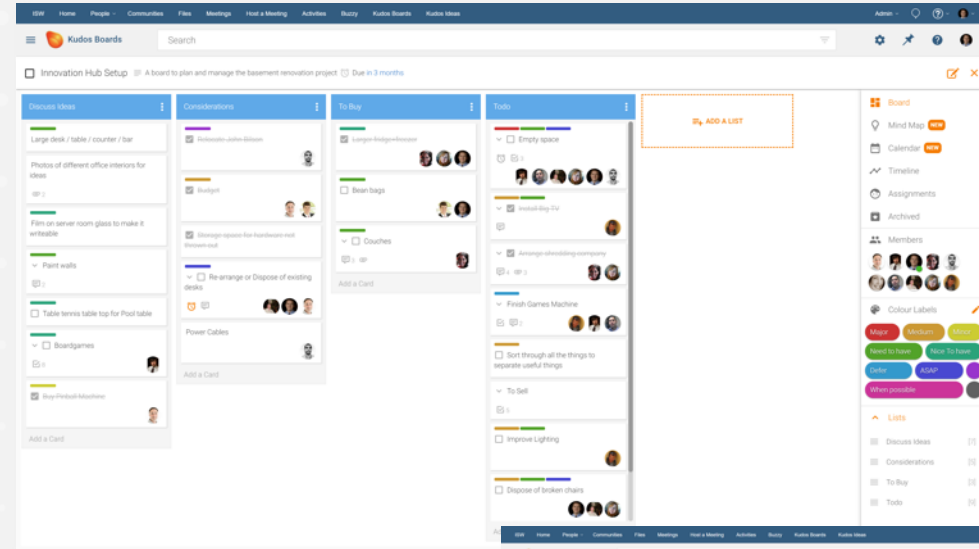

Not part of the free Activities Plus

Activities Plus users can quickly and easily enable the full Kudos Boards experience from within Activities Plus.

The user gets instant access to the full set of functionality including a complete visualisation of tasks such as Boards view, Timeline view and Mindmap view.

Work in your exact same Activity but in an enhanced, more visual view. Experience a full set of functionality to boost your productivity and your team's collaboration.

Get your tasks done with Activities on steroids!
