

Administration shortcuts: get the most out of your domino environment with Ytria's EZSuite

Eric Houvenaghel

Why EZ Suite?

Skip the coding, we've got you covered!

Complete data visibility

Find problems and overall tendencies in properties and settings that would normally go unnoticed, because you can truly see all your data.

Powerful built-in analytics

Perform a wide range of analysis operations on your data thanks to built-in data manipulation tools, such as category groupings, sorting, and filters.

Large-scale edit functions

Use mass-editing capabilities, exclusive edit functionality, and more to solve any problems you may find on a large scale—without losing the big picture.

the EZ Suite Admin

databaseEZ

Manage database properties across your server. Audit, edit, analyze, and report information in a matter of clicks.

aclEZ

Handle your ACL and Group data structure with global insight and mass-edit capabilities.

agentEZ

View your HCL agents in context at the same time, and easily analyze or edit settings collectively.

the EZ Suite Admin

replicationEZ

Understand and manage all aspects of replication information across your digital environment, through a simple, centralized workstation.

consoleEZ

Achieve total visibility over your server consoles or choose only the events you want to see in a central event dashboard.

scanEZ

Easily view and manage document, design and profile information across your HCL Notes database.
