

Saving days of work with the Ytria
Development Suite and focusing on what
really matters.

Eric Houvenaghel

Why EZ Suite?

Skip the coding, we've got you covered!

Complete data visibility

Find problems and overall tendencies in properties and settings that would normally go unnoticed, because you can truly see all your data.

Powerful built-in analytics

Perform a wide range of analysis operations on your data thanks to built-in data manipulation tools, such as category groupings, sorting, and filters.

Large-scale edit functions

Use mass-editing capabilities, exclusive edit functionality, and more to solve any problems you may find on a large scale—without losing the big picture.

the EZ Dev Admin

actionBarEZ

Oversee shared and non-shared actions, bars, and buttons in a single, simple interface.

viewEZ

View and edit all aspects of your views, folders, and the columns they contain in a single, centralized UI.

designPropEZ

Perform large-scale audits of design properties in your HCL Notes databases with 360° insights and visibility.

the EZ Dev Admin

signEZ

Work with design element signatures with unmatched scope, speed, and security.

agentEZ

View your HCL agents in context at the same time, and easily analyze or edit settings collectively.

scanEZ

Easily view and manage document, design and profile information across your HCL Notes database.
