User Groups, Relevance Classes, and Master Classes

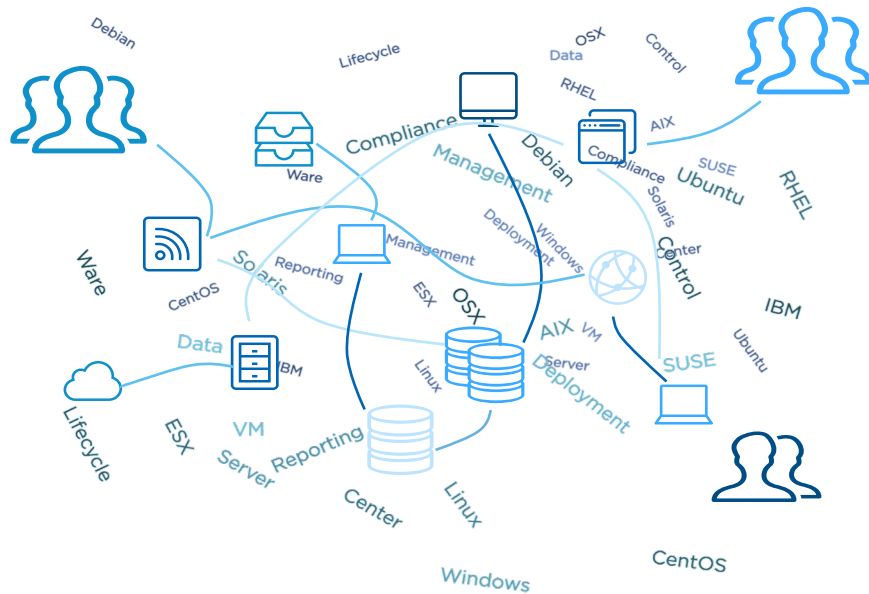

Endpoint Management can be Challenging

- 1 Too many OS-specific tools, agents, consoles.
- 2 Roaming and remote endpoints are 'dark to IT'.
- 3 Lengthy scan/remediate/verify cycles create 'windows of vulnerability' and unacceptable risk.

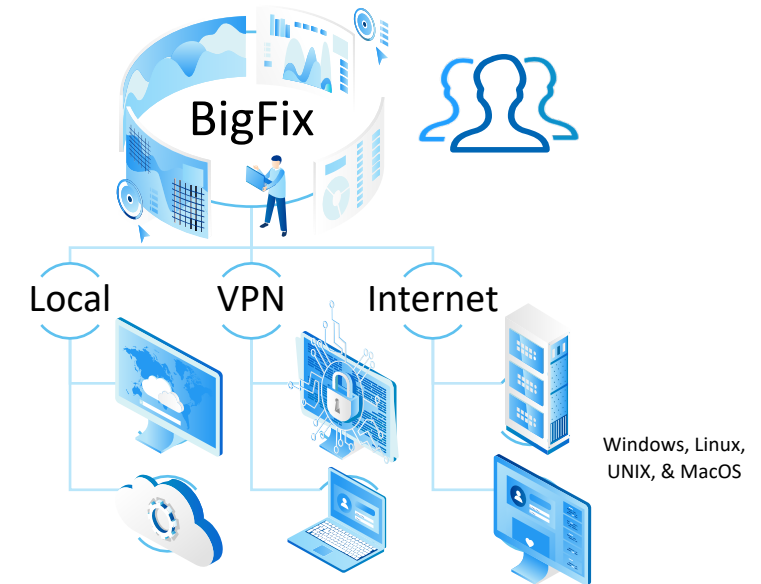

Keeping endpoints patched and compliant remains complex and costly.

Roaming or off-network endpoints may not be visible...creating entry points for attackers.

Executives, board members and supply chain partners increasingly demanding that all endpoints are fully patched and compliant.

Consolidate, simplify and optimize

What is BigFix?

- BigFix is a single, comprehensive solution for discovering, managing and securing connected and roaming endpoints running *Windows, Linux, Unix and MacOS*
- BigFix is a highly scalable, easily deployable solution for *patch, compliance, lifecycle and inventory management* using one intelligent agent and one server*
- BigFix lowers cost, improves security and simplifies endpoint management.

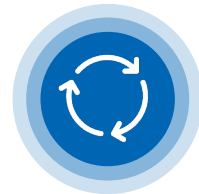

THE BIGFIX PORTFOLIO

Patch

Patches all endpoints – multiple OS's and 3rd Party Apps -- with unprecedented speed and accuracy

Lifecycle

Manages endpoint lifecycle with OS provisioning, software deployment, task automation and remote desktop control

Compliance

Maintains continuous compliance, eliminates configuration drift and improves your security

Inventory

Provides near real-time asset information, eliminates overdeployment and reduce software spend

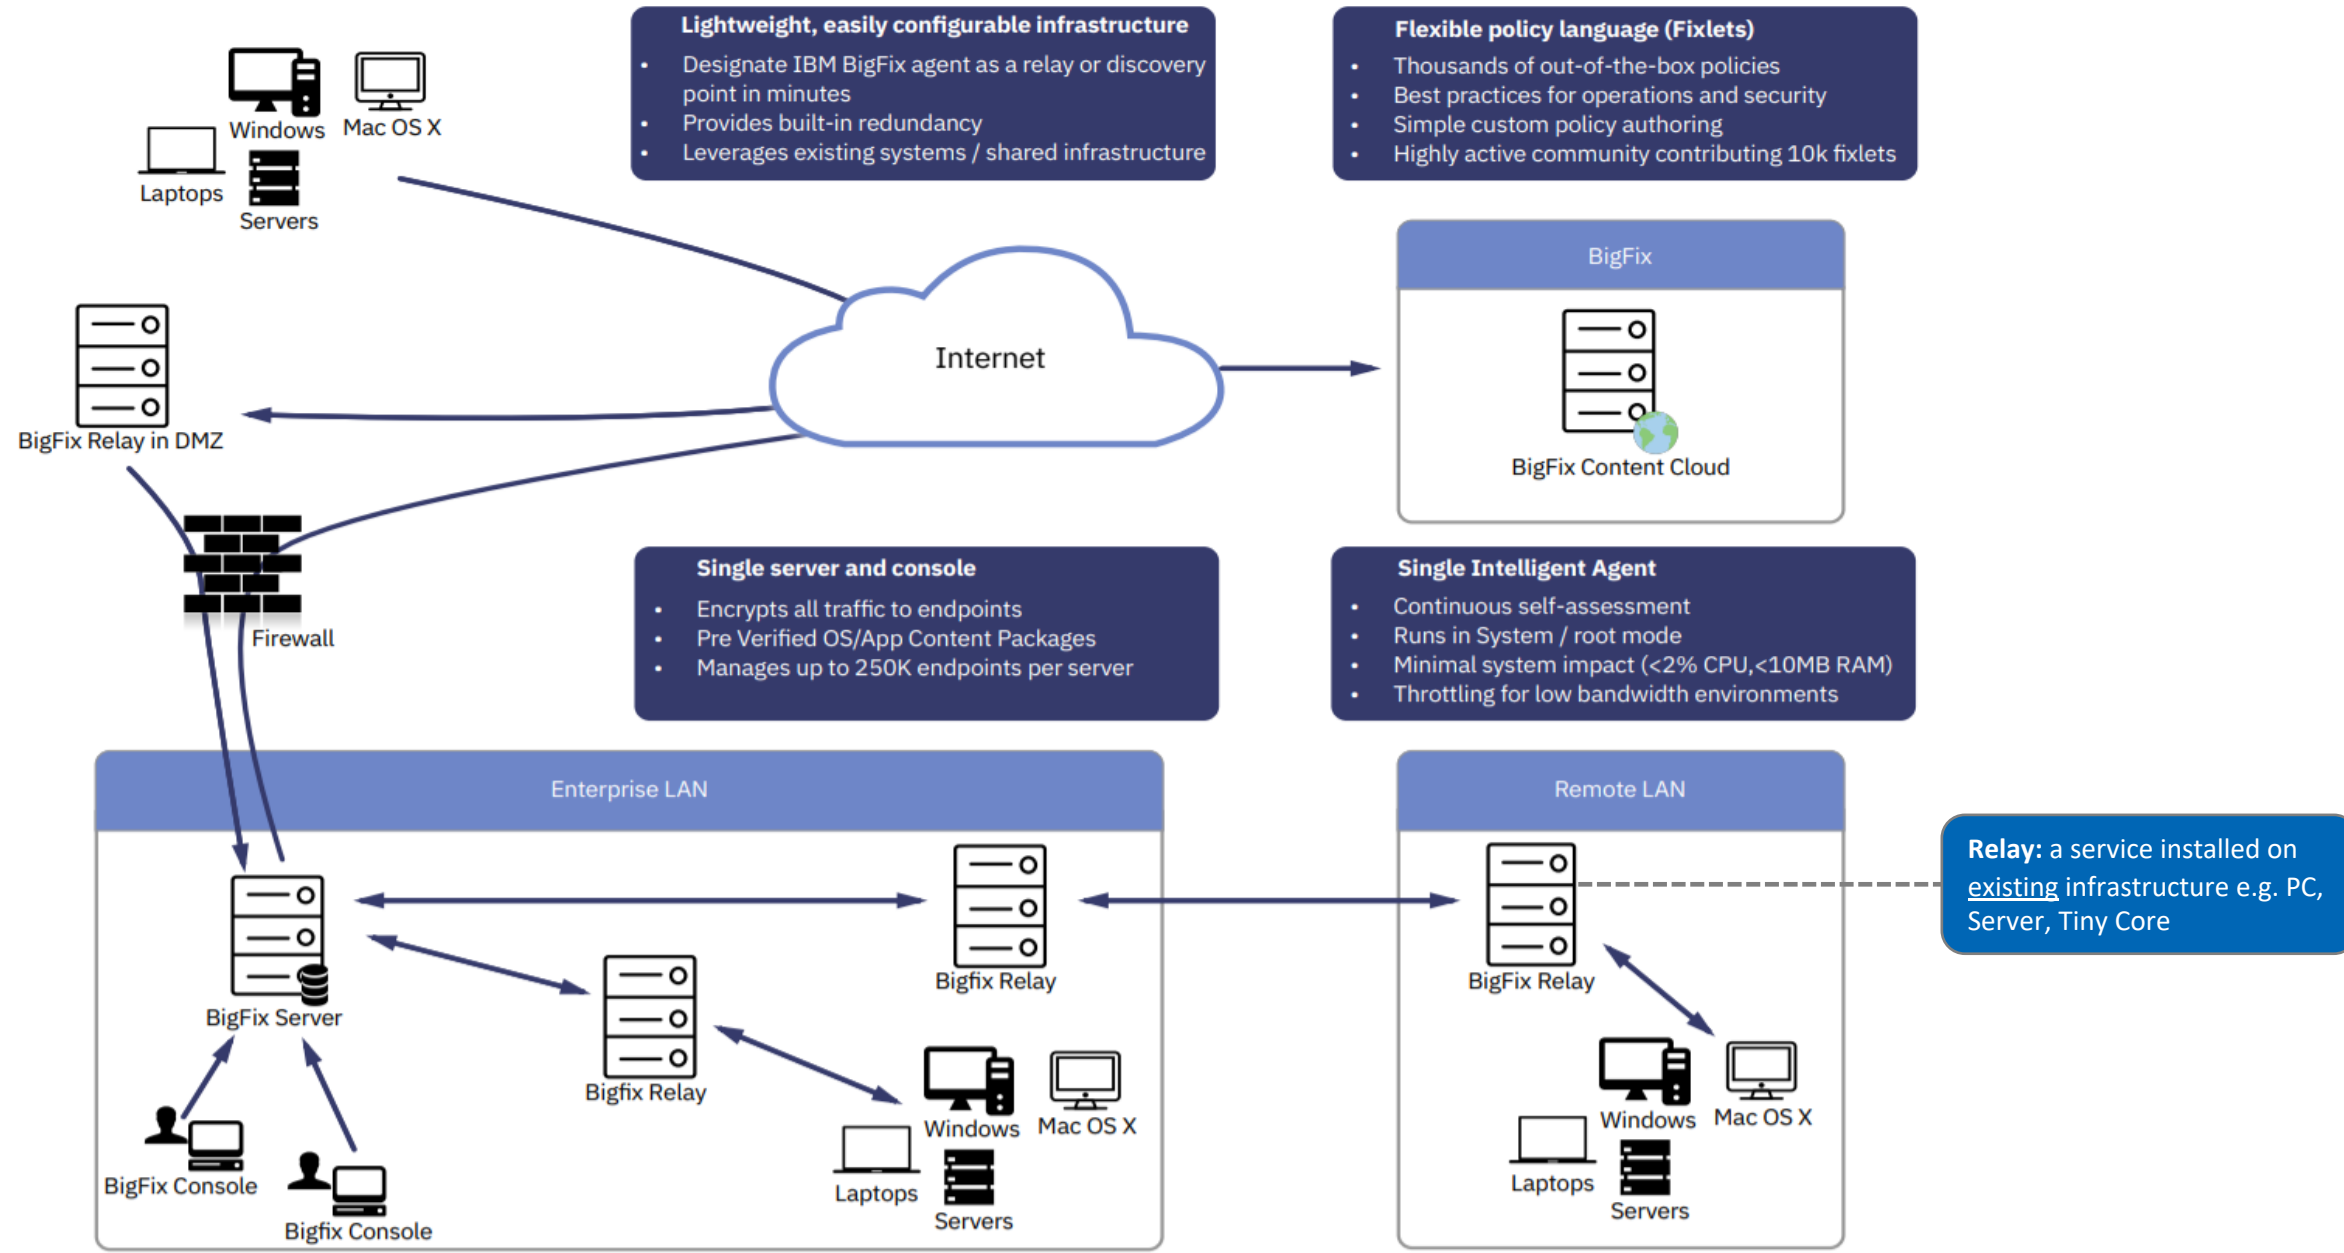

90+ OS and 3rd Party Applications

Single, Multi-Platform Solution with Purpose-built Modules
